BBdkp

managing guilds

1.3.0.9

about

bbDKP is a Dragon Kill Points Mod for your phpBB3 Bulletin board. It was originally forked from EQDKP in 2008.

Dragon kill points are a form of currency in guilds, where members bid on game loot and buy the items, paying in DKP.

Different forms of DKP exist and bbDKP supports four point systems : Standard DKP, Time based DKP, Zero sum and EPGP. they can be combined with each other, except zero sum can't be combined with EPGP.

bbDKP has Game, Guild and DKP management functions built into your phpBB3 Forum.

This way, your users gain single signon to dkp and phpBB3, and you as an administrator or raidleader get a clean interface, robust admin facilities and less integration headaches.

Feature list : Portal with widgets, Dashboard, Statistics, Events, Raids, Member, Items, Roster, Bossprogress page, ACP and UCP modules. multiple games can be installed : World of Warcraft, The Lord of the Rings Online, Dark Age of Camelot, Vanguard - Saga of Heroes, EverQuest I/II, Warhammer Online, Final Fantasy XI, AION, Rift, Star Wars -ToR, Guildwars 2, Tera, Custome game designer

There are a number of plugins, like Raidplanner, Raidtracker, bbTips, Armory import, Apply, and other standalone mods that work well together.

Prosilver styles files are included. The Jade, Deathwing and pbWoW2 styles have premod versions.

Current

1.3.0.9

Installation

Requirements

phpbb 3.0.12

databases : Mysql 5, MSSQL, postgresql, Oracle

PHP 5.3.3 or higher. Curl should be available on your server.

UMIL 1.0.5, Automod 1.0.2

ftp and founder admin access on your phpbb installation.

Make sure you have **Automod 1.0.2** or do the changes manually as described in INSTALL.XML

New installation 1.3.0.9

Adding bbDKP to phpBB3 is easy. like any other mod, you need to do the edits in your core phpbb files, copy the files to your webserver, and then run the database installer.

Note : we advise you to do all php, html upgrades on localhost before uploading it to your web server. Then run the database installer/upgrader on your webserver

Unzip the bbDKP-1309.zip file

Upload bbDKP folder to your webserver, into /store/mods. note that the folder name must be "bbDKP", without version number.

Launch automod, click in "bbDKP", and click the "Install" link. this will copy the files, and perform the necessary edits.

Click on the blue link given, this will redirect you to /install/index.php

Click submit. This will install 1.3.0.9 and clear the caches (template, theme, imagesets)

Upgrading from 1.3.0.x to 1.3.0.9

Unzip the bbDKP-1309.zip file

Upload bbDKP folder to your webserver, into /store/mods/, replacing the bbDKP folder that is there. note that the folder name must be "bbDKP", without version number.

go to Details, and down below you see the available upgrades. (or do the changes manually, described in /contrib/bbdkp_1308_to_1309/update.xml)

Available Changes

MOD Name:	**bbDKP 1.3.0.7 - Update from bbdkp 1.3.0.5** (Install this MOD)
MOD Name:	**bbDKP 1.3.0.7 - Update from bbdkp 1.3.0.6** (Install this MOD)
Language Name:	**Français** – fr (Install this MOD)
Language Name:	**Français** – de (Install this MOD)

Apply the update from Automod "Available Changes"

The MOD requires an external installer to finish installation. Click here to continue to that step.

Return to AutoMOD

DIY Instructions (You need to follow these instructions manually to complete the MOD installation)

Browse to install/index.php and run the Updater.

Upgrading from 1.2.8-pl2 to 1.3.0.9

make a secure backup of all files

backup your database

Uninstall 1.2.8-pl2 and re-install 1.3.0.9 using Automod

If you installed any bbDKP plugins, these have to be uninstalled first.

upload the install folder for any bbdkp 1.2.8 plugin, and run the UMIL uninstaller.

make sure the module was uninstalled by checking the ACP modules.

run plugin uninstall from Automod.

then, from Automod, do uninstall bbDKP 1.2.8-pl2 to uninstall the files and phpbb edits.
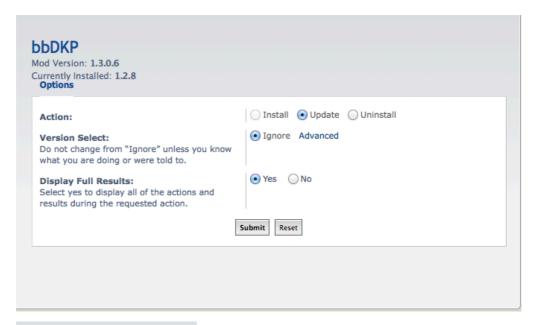

purge the board cache, verify your board is running

delete /store/mods/bbdkp

upload the unzipped bbDKP-1308/bbDKP folder to /store/mods

from Automod, run file installer

Click on the blue link given, this will redirect you to /install/index.php, then click "update". This will update the database from 1.2.8-PL2 to 1.3.0.9

[FIXED] ticket 8 logging, removed {}, no longer necessary to use mb_ereg_replace in function getaction

[FIXED] ticket 7 removing raidmembers didnt get deleted (svn 932-933)

[FIXED] ticket 5 : removing a guildmember would cause an error

[FIXED] ticket 4 (date zone checks) r906

[FIXED] ticket 3 guildname is now max 255 chars

1.1.0-RC2 24-01-2010

[NEW] about box now done with jQueryTools

[NEW] lotro bossprogress

[NEW] EQ2 bossprogress tier 8

[FIXED] tracker issue 2 :Addmember ACP rank dropdown, now updates when guild dropdown value changed, added ajax js

[FIXED] Member Raidattendance pct will now correct for members who joined within attendance period. new ratio = (memberattendance count within 30/90 days) / (number of raids within 30/90 days or since member joined)

[FIXED] RC1 member_ranks installer

[FIXED] Item search ACP

[FIXED] guild add ACP

1.1.0-RC1 17-01-2010

[FIX] listmembers now supports composite sorting on all columns

[NEW] Portal rewritten, now supports paging

[FIXED] bbdkp is now compatible with PHP 5.3.0

[NEW] Aion support

[NEW] Eq2 bossprogress till Kingdom of Sky

[NEW] Wow bossprogress till Icecrown

[NEW] Multiple guilds

[NEW] Itemstats removed, it is now a plugin (bbTips)

[NEW] Leaderboard works for all games

[NEW] Roster works for all games, but only has player portraits for Wow & Aion

[NEW] Player Stats page works for all games

[NEW] Database table backup, uses phpbb functionality

[NEW] Installer rewritten using UMIL class

[SPLIT] Game installer files are separate now

[CHANGED] Armoryplugin, Ctrt, Apply installer moved to plugin Installers using Umil.

[FIXED] includes all patches up to RC1 Patch 10, ensured all html is XHTML validated

1.0.9

not released

1.0.9 RC2

not released

1.0.9 RC1 04-2009

[CHANGE] changed roster table to reflect new blizzard xml

[CHANGE] Moved phpbb_itemstats inclusion to common.php to minimize patching.

[FIXED] removed all stripslashes to comply with coding guidelines because addslashes is not used since we use the phpbb mysqli_real_escape_string() wrapper

[FIXED] Warcraft leaderboard will now not show when another game is installed

[FIXED] Added css to change indexpage width to 100%

[NEW] Added bbdkp killswitch in config.php

[NEW] Bossprogress for Wow updated to Ulduar (thanks to Orshee for Ulduar sql)

[CHANGED] eqdkp validation class replaced by phpbb

[CHANGED] log system now uses xml format, no longer eval

[CHANGED] installer and updater now require you to be logged as founder

[NEW] now supports Automod (tested on v1.0.0b2)

[FIXED] php files now follow javadoc documentation guidelines

[CHANGED] link section removed in install.xml and all bbdkp plugins moved to their own package.

[FIXED] roster membercount

[CHANGED] moved dkp link query in to global $config (thanks DorEli)

1.0.9 Beta 4 02-2009

[CHANGED] changed variable constants from common.php to $config array, so less lines to edit in common.php

[CHANGED] moved /includesdkp/bossprogress to /includes/bossprogress

[CHANGED] rewritten bossprogress block, no more include errors.

[FIXED] corrected raid log bug in bossprogress (AnubRekhan - svn 292 - thanks digitaldew)

[ADDED] Armory character import added

[ADDED] Armory multiple guilds import added

[CHANGED] new Roster template per class

[CHANGED] new About.php

[CHANGED] moved logic in /includesdkp/komptab.class.php to about.php, since this is pure html.

[CHANGED] moved html part of about.php to /styles/stylename/template/dkp.about.html because of code clarity

[CHANGED] dropped bbeqdkp_config table and moved values to phpbb_config. the /includes/cache.php doen‚Äôt have to be patched anymore.

[ADDED] new file /includes/bbdkp/constants_bbdkp for storing all constants. this is cleaner than having to patch it all in common.php

[CHANGED] changed all root pathes to $phpbb_root_path = (defined(‚ÄôPHPBB_ROOT_PATH‚Äô)) ? PHPBB_ROOT_PATH : ‚Äò./‚Äô;

[CHANGED] replaced all $SID with append_sid() function (no more logouts if cookies are disabled!!!)

[FIXED] fixed pagination on viewmember.php, listitems.php, listmembers.php

[CHANGED] mpv validation tool changes : changed file endings to LF, removed center tags to Style align, used ‚Äú&‚Äù instead of plain ‚Äú&‚Äù, eliminated tags, moved them to a style section, fixed nonclosing UL and LI tags

[CHANGED] added IN_PHPBB checks

[FIXED] fixed the /adm/adm ACP link bug (due to forgotten braces in in /includes/functions.php patch)

[CHANGED] moved /itemstats to /includes/bbdkp/itemstats. changed all /include paths

[DELETED] itemstats sqlhelper.php is now deleted, since it uses the $dbal class from phpbb. all query calls have been changed

to reflect this.

[DELETED] No more Itemstats/config.php since database connection is now handled through phpbb.

[CHANGED] new itemstats ACP to change providers and other preferences. no more editing config files

[CHANGED] permissions_phpbb.php doesn‚Äôt have to be patched anymore since there is a new permissions file now in /language/en/mods

[FIXED] and some other bugfixes

1.0.9 Beta 3 28-12-2008

[UPDATED] - Listmembers/leaderboard + stats redone - details see svn 226,230,241

1.0.9 Beta 2 15-12-2008

[FIXED] issue in armory parser (svn 205-206)

[FIXED] issue with updater and class_id =0 (svn 205-206)

[FIXED] issue in armory downloader (svn 204

[FIXED] added checks in apply plugin (svn 203)

[FIXED] issue with itemstats in listitems.php and viewmember.php (svn 200)

1.0.9 Beta 1 14-12-2008

[ADDED] - Wotlk update

[CHANGED]- DKP ACP Module link in Menu is now dynamic, no longer fixed to 190

[CHANGED]- bbDkp installer rewritten : plugin and bbdkp in one

[ADDED] - multiple dkp pools are now implemented. Dkp pool popup added to Stats, Listmembers, Items pages, and in ACP

[CHANGED] - Database structure : a new indexed field for DKP pools was added in transaction tables

[CHANGED] - Database structure : new tables for Member DKP, Member List, DKP Pools.

[ADDED]- bbDkp automated DB bbdkp and plugin updater from 1.08 to 1.09

[CHANGED] - Member screen allows keeping notes, guild entry and leave dates, based on armory import.

[CHANGED] - Leaderboard is now stretched over 2 lines (5+5) because 10 classes on one row became too cramped.

[CHANGED] - CTRT : updated for multiple dkp

[UPDATED] - Bossprogress : Added support for Eq2: Boss/instance arrays are in eq2_data.php,

[UPDATED] - Bossprogress: updated lotro_data.php with data from Annuminas to Carn Dum

[UPDATED] - Bossprogress : bossdate.php is complete with Wow, Eq2 and Lotro

[CHANGED] - Bossprogress : Installer will write offset data for all Eq2, Wow, Lotro Raids.So this means

that all games are now supported, just need the right boss information, for Warhammer, FFXI, eq & others, i put dummy data.

[UPDATED] - Bossprogress : refreshed boss instance pictures for Wow, added Wotlk images.

[CHANGED] - Bossprogress : progressblock colour is now css based

[UPDATED] - Roster : Now shows different icons for class 70 / 80

[ADDED] - Roster : Deathknights added as class

[CHANGED] - Roster : acp redone : Transfer to Members Table tab will Insert new, Update existing and Set

old members to inactive. You can also Edit Guildrank names and set some ranks to 'Hidden'

[UPDATED] - Recruitment block : Updated icon, added Death Knights.

[FIXED] - Recruitment block : now supports spaces, Hyphens removed in name.

[ADDED] - Application plugin : Posts a post in a forum specified in the ACP with the answers to the

questions that can be added in the ACP. Also supports getting information from the armory like race, class, talents, professions.

1.0.8 Beta 5 revision 72 23.9.2008

[ADDED] - raidprogress block added

1.0.8 Beta 5 revision 60>70 15.9.2008

[FIXED] - correction in template footer

[FIXED] - copyright links in install process wasnt documented

[FIXED] - Bossprogress Kiljaeden ID was wrong

[FIXED] - ctrt importing raids with ' sign in eventname

1.0.8 Beta 5 revision 59 x.7.2008

[FIXED] - Intall process is redone, core phpbb3 files removed from bbdkp distribution

[NEW] - Itemstats FR/DE support

[FIXED] - viewmember.php item pagination is fixed

[FIXED] - Bossprogress showed Halazzi as Janalai kills and viceversa

[ADDED] - Roster shows level

1.0.8 Beta 4 - 25.4.2008

[ADDED] - Leaderboard under the standings page as well as Class Colors. :D

[ADDED] - Enhanced Recruitment Block (can now specify spec's, like Shadow Priest, Enhance Shamans, Fury Warriors etc...)

[ADDED] - Instructions on how to add [item] [/item] buttons to phpbb3 forums.

[ADDED] - "DKP" text & link to language file (now it can be multi-lingual) as well as many other variables to increase multi-lingual support :D .

[ADDED] - "Forum Index" link to both templates (so theres both an "Index" and "Forum Index" in the menus for easier navigation.

[ADDED] - Added SQL statements to index.php to make more forum data available for use (login times etc).

[ADDED] - Event & Raid Triggers for CTRA.

[ADDED] - Install Folder for plugins/main install for added security and vulnerabilities that can arise when files are not deleted after install.

[UPDATED] - CTRT Updated 1.16.8.

[UPDATED] - Bossprogress for Zul'Aman, and Sunwell

[UPDATED] - Raidnote/event triggers for ZA/Sunwell (SW Untested).

[UPDATED] - Project/Team Information Information.

[UPDATED] - Armory plugin now inserts ranks, and removes members who leave/quit/kicked from the guild.

[UPDATED] - Functions.php to work with phpbb3 3.0.1 updated

[UPDATED] - Updated Wowhead image directory for Itemstats

[CHANGED] - Changed the way you install/update plugins. Plugins are no longer installed on standard default installation of bbDKP.

[CHANGED] - WoW is the Default install for bbDKP (Mainly concerns items stats, But you can easily edit config files to change it to LOTRO.

[CHANGED] - When clicking the "Admin" button under the DKP section it will automatically take you to the DKP tab of the ACP.

[FIXED] - Raid Note Parsing error for CTRT when using an apostrophe.

[FIXED] - Main Installer updated, fixed syntax problem.

[FIXED] - Itemstats fix, wowhead default and function itemstats_decorate_name2($name, $buyer, $price, $class) is back alive.

[FIXED] - Fixed CTRT import error. (returning 0 no matter what).

[FIXED] - CTRT now works with special characters so that name like "Ani√´r", and works as intended.

[FIXED] - Roster support names like "Ani√´r", and should link to armory correctly

[FIXED] - Now can scroll through items if the users have more than X amount of items looted to them(20 is default).

[FIXED] - function GetRankIdByRankName.

[FIXED] - all mySQL tables should now be utf8 (including plugins).

[FIXED] - UCP auth fix.

[FIXED] - The ACP check for newest version should be less sensitive to test version being tested. and not always saying that a new version is out when there is not public version out.

[REMOVED] - dkp/overall_header_menu.html and dkp/overall_footer.html .Now you just use your standard template overall_header.html overall_footer for your new themes. :idea: :D

[REMOVED] - "Who is Online" menu box.

[REMOVED] - All old references to "phpbb3 + eqdkp Integrated" as project name, with the new project name of "bbDKP"
